

TS-270 全自動多色鞋面射出機 AUTOMATIC ROTARY PLASTIC UPPER INJECTION MOLDING MACHINE

Application 功能:

This machine is specialized in the manufacture of various kinds of one-color, two-color, three-color vamps, V straps, inserts etc. 專門生產各類單、雙、三色鞋面，人字帶、飾片等。

Feature 特色:

- The well-interconnected oil circuit by electric control can reduce waiting time, quicken production rate, and promote productivity. 油路電控搭配無間，減少等待時間，生產快，提高產量。
- Number of various stations may be optionally chosen for small quantity but greater in variety, or mass production.
具有各種站別數量的選擇，適用於少量多或大量生產。
- The devised C-shaped structure that strengthens cooling system suits particularly the need for reinforced cooling effect.
C型結構設計，強化冷卻系統，適合需要加強冷卻效果強。
- The multi-station mechanism is suitable for numerous molds to work in production line. It saves the time for the mold-change and extends the length of cooling time. The working efficiency is highly enhanced.
多站設計可適用更多模具同時生產，減少換模及加長冷卻時間。

Specification 規格表:

機型 Model	TS-270-1	TS-270-2
站數 No. of stations	10	10
夾模壓力 Clamping pressure	140 kg/cm ²	140 kg/cm ²
最大射出行程 Max. screw stroke	150 mm	150 mm
最大射出量 Max. injection volume	238.5*2 cm ³	238.5*2 cm ³
機械尺寸 Machine size	570*290*220 cm	680*300*220 cm

LEADWAY
